

Mad Scientist SUMMER CAMP

June 24-27: 9:30 AM-4:00 PM
Rising 6th-8th Grade

Johnston Community College, Health Sciences Building

SCIENCE touches everything we do!

**Join us for hands-on experiments that
explore chemistry, biology, physics, and more.**

Potions Day - Learn lab safety, the scientific method, and chemical reactions. Activities include chalk chromatography, decorating backpacks, making lava lamps, and more!

Power Day - Learn about alternative sources of energy. Activities include making solar-powered ovens to cook s'mores, making human batteries, building wind turbines, and more!

Monster Day - Become emerged in the world of anatomy and physiology by seeing what it would take to make and keep a monster alive!

Spy Day - Dive into the secret world of spies! Activities include code-breaking and code-building, using and identifying invisible inks, making camouflage, and working with biometrics.

Together we will imagine new possibilities in the world of science!
